

PROJECT SUMMARY

MARSULEX ENVIRONMENTAL TECHNOLOGIES RELEASES LIST OF INTERNATIONAL WFGD CONTRACTS WON BY LICENSEES

Lebanon, Pennsylvania - April 21, 2009 - Marsulex Environmental Technologies (MET) has released details of seven international projects for flue gas desulfurization (FGD) systems awarded in 2008 in addition to those previously announced. These awards, contracted through MET licensees in the Peoples Republic of China and Italy, will account for an additional 23 FGD absorber systems servicing a total of 4,800 megawatts (MW) of electrical generation. The projects utilize MET's wet limestone FGD technology that produces environmentally friendly gypsum as a by-product of the process. Each award, summarized below, attest to both the cost-competitive design and solid technical performance of MET's FGD systems.

Plant	Location	MW	SO ₂ Removal	Licensee
Pucheng Power	Shanxi Providence of China	2 x 300	95%	CHEC
San Phillip Power	San Fillipo del Mela, Italy	2 x 160	96%	Thermokimik
Saudi Kayan Petrochemical	Al-Jubail, Saudi Arabia	80	90%	Thermokimik
Huaneng Fuzhou	Fujian Province of China	2 x 660	95%	Sichuan Entech
Weiquiao Aluminum Power	Shandong Province of China	8 x 50	95%	Shanda Wit
Yaomeng Power	Henan Province of China	4 x 300	95%	KRJS
Huadian Jiaozuo Power	Henan Province of China	4 x 220	95%	CHEC

Marsulex Environmental Technologies (MET) is a world leading provider of FGD systems and technology. MET FGD systems service over 80,000 megawatts of power generation in 22 countries. MET is a subsidiary of Marsulex Inc., a Toronto-based public company with shares listed on the Toronto Stock Exchange, trading under the symbol MLX.
